

Working With the Dataset

Loading The Dataset

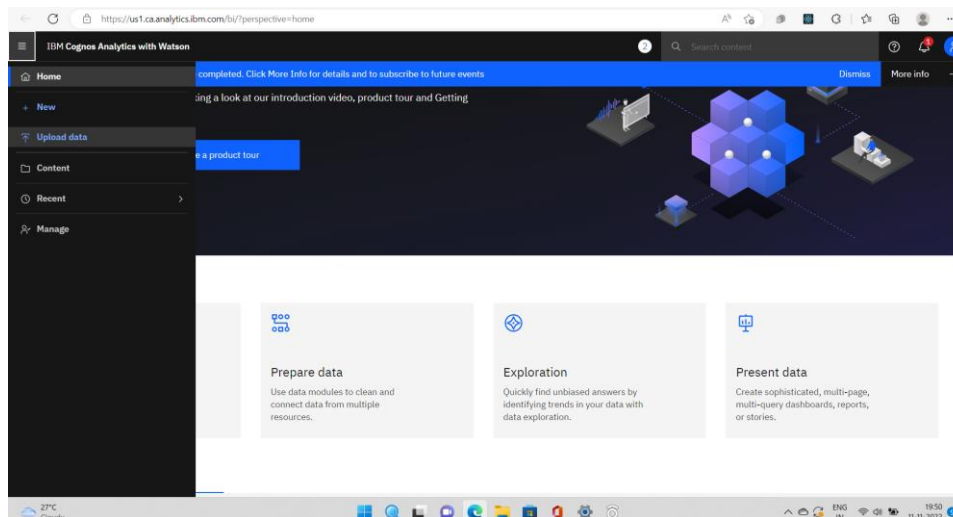

Team ID: PNT2022TMID28405

Project Name : Estimate the Crop Yield Using Data Analytics

Loading the dataset into IBM Cognos

- Before you can build a view and analyze your data, you must first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places.
- The data might be stored on your computer in a spreadsheet or a text file, or in a bigdata, relational, or cube (multidimensional) database on a server in your enterprise.
- In our case, we will be using a spreadsheet or text file for making our analysis. Go through the video for understanding the connection of dataset in Cognos.

GO TO UPLOAD DATA ON THE MENU:

UPLOAD DATASET INTO UPLOAD DATA COLUMN:
